

Blaze Money Wheel Gaming Table

Blaze Money Wheel tables, paired with the Blaze LED Money Wheel provide an eye-catching option for your casino, with patented customised animations attracting players to the table. With game sequences projected under the option of an acrylic screen or traditional cloth layout, Blaze provides a unique visual for your casino floor.

Features & Benefits

- Global patent for displaying animated graphics on the gaming surface
- Brings additional attraction and excitement for both new and existing players
- Assists dealer accuracy and highlights winning bets for added security
- LCD touch screen dealer console
- Low maintenance with long-life LEDs
- Compatible with both the 52 or 54-pin LED Money Wheels
- Customised graphics and messaging
- Easy to operate and little training required

Stunning Game Sequences

Blaze Money Wheel Tables provide stunning game sequences which are projected under an acrylic screen or traditional cloth layout.

These patented eye-catching animations attract, excite and captivate new and existing players, providing a unique visual spectacle for your casino floor.

Wide Range of Design Possibilities

With the flexibility of Blaze LED Surface Technology, your casino can create its own unique and interactive themes for your Money Wheel games. Previous themes include a music inspired Jukebox which players can rock out to, as well as a Pinball-inspired game that brought the vintage arcade theme to the casino floor. Your imagination is the only limit!

Latest in LED Surface Technology

Blaze LED Surface Technology is energy efficient and offers much longer operating life compared to traditional illuminated tables, which consist of a light box and individual lights that require regular replacement. Comparatively, Blaze uses a single LED surface under the layout meaning that game play is uninterrupted and regular maintenance is limited.

Product Specifications

Table Height	814mm	32.05in
Table Width	2334mm	91.89in
Table Depth	1414mm	55.67in
