

Ora Grande Casino Table Display

Featuring sleek curved lines with integrated LEDs and our largest 32" screen, Ora Grande provides excellent visibility from multiple angles across the casino floor.

Suitable for Roulette, Sic Bo and Money Wheel games

Double-sided display to attract more attention to a table and increase marketing potential

LED strips for attraction, game status, trends, table minimums

Adaptive display screen graphics and multiple skin options

Easy installation with non-screw quick mount pole

Standalone or networked, which allows centrally controlled graphic content, media scheduling and streaming

Automated attract sequences and live winning number statistics displayed on an easy to read graph

Graphics and animations can be configured using winning numbers, stats, advertising content and video

Multiple language and currency options

Draws Attention and Create Excitement

The Ora Grande Display features our largest 32" double-sided screens along with sleek curved lines with integrated LED's providing excellent visibility from multiple angles right across the gaming floor. Available in portrait format which is perfect for Roulette, Sicbo and Money Wheel (Big 6) games, there is no chance players will miss out on any of the action with these large screen displays.

High-Impact Graphics

High-impact graphics can be configured through the Dynamic Display System (DDS) or the ADC system. This provides a plethora of variable graphics and animations to be configured in numerous combinations allowing winning numbers, stats, and promotional content to be displayed exactly how the operator requires.

With the choice of various languages, currency symbols and ticker tape messaging, the Ora Grande provides all the information your players will need.

Flexible and Easy to Control

Like all TCSJOHNHUXLEY Ora Table Displays, Ora Grande can be standalone where features are altered individually at the table, or networked to allow changes to be made from one central point to every display across the gaming floor.

Dynamic Display System - Default Skins

The Dynamic Display System is set up with a default standard set of five display skins that provide a wide variety of themes / styles to suit any casino's requirements.

It is also possible to have custom skins designed and this service is available at an extra cost. For more information, please contact your local sales team.

ADC Display System

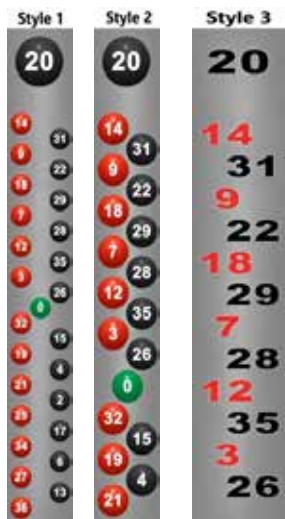

The ADC (Android Control Unit) Display System is a software compatible with portrait displays that enables the configuration of high-impact graphics.

Operators will be provided with a keypad that enables them to make configurations on the display. There are numerous options available including custom backgrounds, logos and ticket text.

Table name, minimum & maximum can be easily changed via settings in the menu, during operation.

Certain configuration options will need to be determined prior to installation. For more information, please contact your local sales team.

Results History Stack can be configured to one of three styles.

Min, Max values can be disabled / enabled and moved around the display to fit with an operator's requirements.

Option to add company logo.

Media player can play any .MP4 video that is 1280 x 960px. Otherwise the default option is a single 0 wheel.

Additional Information:

- Option to apply custom backgrounds, colour themes and table closed signs.
- Table name, minimum & maximum can be easily changed via settings in the menu, during operation.
- "Good luck" & "No More Bets" animations are only available in English, Spanish and French.
- Compatible with all currencies.

Ticker text can be added as a single line or a cycling list of statements. Otherwise the default option is no message.
