

Blaze Roulette Gaming Tables

Blaze for Roulette takes Roulette tables to the next level! With an LED Lightbox beneath the gaming surface, which allows you to display eye-catching animations, game state prompts and winning numbers. TCSJOHNHUXLEY holds the global patent for displaying animations on the gaming surface making Blaze one of a kind.

Features & Benefits

- Global patent for displaying animation on the gaming surface
- Available in Single, Double and Triple Zero options
- Cloth layout gaming surface
- Highlights winning numbers and bets to assist players and dealers
- Quick and easy to install
- Option to include Neighbour Bet Grid / Racetrack
- Low maintenance and long-life LEDs
- Enhances security by illuminating winning bets and pay-outs
- LCD touch screen dealer console
- Easy to operate with little training required
- Compatible with all TCSJOHNHUXLEY Roulette Wheels and the Winning Number Display range

Fully Automated

Blaze Roulette is fully automated. The dealer is only required to manually void the game if necessary. Voiding the game is done through a dealer console like other Blaze games. Winning numbers are passed to the Blaze system and Winning Number Display directly from an integrated Saturn™ Roulette Wheel, TCSJOHNHUXLEY reader head or connection to a third-party wheel.

Energy Efficient

Unlike traditional illuminated tables, which consist of a light box with individual light bulbs that require regular replacement, Blaze LED Surface Technology is energy efficient that offers thousands of hours operating life. This means that game play is uninterrupted and regular maintenance is limited.

Create the Winning Combination

Blaze and the Saturn™ Glo Roulette Wheel make a winning combination, lighting up your gaming floor with their automated and synchronised colour changes which clearly indicate attract mode, 'Place Your Bets', 'No More Bets' and specific winning numbers. Compatible with all TCSJOHNHUXLEY Roulette Wheels and the Winning Number Display range.
