

# LED Money Wheel

Available in either 52 or 54-pin wheels the LED Money Wheel makes an outstanding feature on any gaming floor.

## Features & Benefits

- Two stand options - wooden or metal
- Available in 52 or 54-pin Wheel
- Artwork protected by clear Perspex
- Brings additional attraction and excitement for all players
- Perfect partner for Blaze Money Wheel Gaming Table
- Engaging 'attract modes' with a wide variety of graphic options

## Manufactured to the Highest Standards

Precision engineered and incorporating the latest illumination technology, the LED Money Wheel provides eye-catching 'attract modes' with a flexible range of graphics to suit any theme.

The LED Money Wheel has two stand options to suit any budget. Operators may choose the traditional wooden stand, which includes a built-in storage compartment, or they may opt for the modern metal stand, which can be retrofitted to include a built-in Winning Number Display on the back.

## Perfect for Blaze

The LED Money Wheel is the perfect partner for the Blaze Money Wheel Gaming Table. Blaze LED Surface Technology is energy efficient and offers much longer operating life compared with traditional illuminated tables, which consist of a light box and individual lights which require regular replacement. Comparatively, Blaze uses a single LED surface under the layout meaning that game play is uninterrupted and regular maintenance is limited.

## Truly Unique

With the flexibility of Blaze LED Surface Technology, you can create your own unique and interactive themes for your LED Money Wheel games. Previous themes include a music inspired Jukebox which players can rock out to, as well as a Pinball-inspired game that brought the vintage arcade theme to the casino floor. Your imagination is the only limit!
