

Peacock Table Limit Display

The Peacock Table Limit Display clearly shows minimum and maximum table bets for players whilst showcasing promotions and marketing information

Easy Installation and User Friendly

The Peacock Display is quick and easy to install and allows the unit to be installed in the table. There are also options for a table top mount or table bracket installation kit, available on request.

The functionality of the Peacock Display is simple and easy-to-use with content downloads and uploads accessed using a Wi-Fi or direct Ethernet connection. There are also standby features for displaying and looping advertisements when the game isn't in play and Min / Max bets and screen colours can easily be changed via the touch screen menu.

- Standby features for displaying & looping advertisements when game isn't in play
- Touch-screen to access menu and change min/max bets
- Multiple language and currency options
- Wi-Fi & Ethernet compatible

Peacock Table Limit Display

Table signage from TCSJOHNHUXLEY is the perfect way to compliment your gaming tables, clearly showing players the minimum and maximum table bets whilst also showcasing promotions and marketing information.

The Peacock Display features a sleek 10 inch touch-screen monitor, which allows you to change the minimum and maximum bets by simply touching the front screen command box. In addition, media files can easily be uploaded via a web based portal with unique customer log in details, which allows users to upload media in PNG, JPEG format as well as MP4 and AVI videos.
