Qorex Games

With the touch of the screen players can choose from multiple games of live Roulette, Sicbo and Baccarat all with the same intuitive user interface

Features & Benefits

Multi-game functionality

Live and RNG Driven Games providing players with a variety of games and table to choose from

Connects to live tables which helps maximise operational resource whilst providing social distancing

Favourite game and table selection provides players with the ability to quickly place bets without moving between tables

Simultaneous betting allows players to quickly place multiple bets (where gaming regulations allow)

Side panel shows other available games and independent game states

Live camera feed provides players with a view of the live wheel

Traditional and Racetrack view options for Roulette

Swap Between Games Easily

Swapping between games has never been easier thanks to Qorex's consistent user interface. Using the easy to navigate side bar players can filter game types and pre-select favourite tables. This keeps navigation simple and allows players to quickly place bets and repeat bets without having to change between tables.

Live Camera Feeds

Qorex Terminals can be connected to cameras located on gaming tables to show the player live feeds of the game. This includes live feeds of Roulette Wheels, Card Shoes and even Dice Shakers. The live feed camera display allows the player to see wheel and its result as it happens, with the ability to drag the image anywhere across the screen so it does not obscure betting. Players can also view a wide range of game statistics and trends at any stage.

Seamless Integration

Qorex Terminals can be used in-conjunction with all **TCS**JOHNHUXLEY Roulette Wheels (Mark VII, Saturn™, Saturn™ Auto) and **TCS**JOHNHUXLEY Dice Shakers. The terminal can also be used with 3rd Party Roulette Wheels and Card Shoes meaning existing equipment can be used without having to invest in new additional equipment. For further flexibility, the terminal can integrate with a variety of Player Tracking Systems, SAS Systems and Note and Ticket Printers.
