

Saturn™ Auto Roulette Wheel

The Saturn™ Auto Roulette Wheel is the world's first and only compact, table top, automated roulette wheel, perfect for any casino.

Features & Benefits

- Same footprint as a traditional Roulette Wheel
- Three discreet embedded sensors to detect winning numbers
- Three flexible operation modes - Remote, Manual and Automatic
- Change between modes quickly and easily
- Can be controlled by third-party hardware
- Patented ball firing and recover technology
- Supports low staffing levels by connecting to EGTs such as Qorex or operating with fixed game cycles.
- Eye-catching LED Technology
- Safe and secure 24-hour operation
- All the benefits of the Saturn™ Roulette Wheel
- Master craftsmanship design and build
- Compatible with other TCSJOHNHUXLEY products including the Winning Number Display range

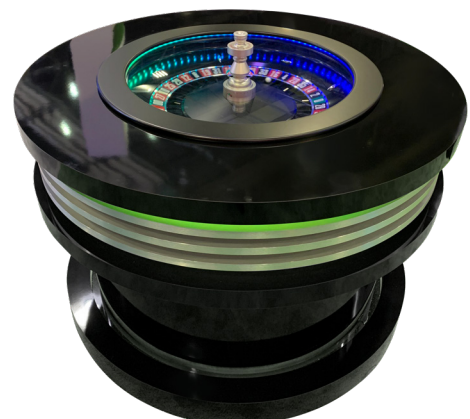

Compact Design

Unlike other automated Roulette wheels that require a bulky podium to house large technical equipment, the Saturn™ Auto is uniquely compact. Thanks to this distinct design, it can sit on an existing Roulette table, integrate into furniture (supplied without wheel covers) or be displayed on a bespoke, stand-alone podium – providing flexibility for any gaming floor.

Unique Launching System

With a powerful, unique launch system, the Saturn™ Auto fires the ball out with a spin in order to increase randomness. The Saturn™ Auto comes with three operation modes, Full-Automatic (System Driven), Automatic and Semi-Automatic, making it the auto wheel that can meet any casino requirement.

Controlled Spin

The Full-Automatic controlled spin from the patented launch system allows for connected devices (Qorex or a third-party EGT) to control when the spin is started, while the automatic setting allows for a set amount of spins per hour. Finally, the Semi-Automatic setting allows for dealer interaction through use of a dedicated ball 'fire' button.

Built-in LED Lights

With stunning built-in LED Lights, the Saturn™ Auto's eye-catching visuals and prompts heighten the game experience. Working in conjunction with the Auto's three discreet sensors, the LED lights combine to indicate to players and dealers the game status, including 'New Betting Sequence', 'Finish Betting' and 'No More Bets'.

Product Specifications

Diameter	832mm	32.75in
Bowl with feet	225mm	8.85in
Shipping Weight	83kg	182.98lbs
Configuration	Single Zero, Double Zero, Triple Zero
