

Saturn™ Roulette Wheel

Combining master craftsmanship and innovative security the Saturn™ Roulette Wheel from TCSJOHNHUXLEY is the most technically advanced wheel in gaming.

Features & Benefits

Three discreet embedded sensors to detect winning numbers

Saturn™ Data Logger allowing for the detection of winning number results, ball Drop Zone Detection, reporting and error indicators

Optional built-in white LED lights in rim

Master craftsmanship design and build

Communicates with other third-party applications

Compatible with other TCSJOHNHUXLEY products including the Winning Number Display range

Near indestructible Velstone™ Ball Track

Available in an extensive range of colours and veneers

Fully customisable through our Roulette Wheel Configurator

Built-in Technology

With three reading sensors discreetly embedded in the rim, the Saturn™ Roulette Wheel detects accurate winning numbers, fast. It also features patented 'Drop Zone Detection', which reports on non-random results and drop zone bias caused by inaccurate balancing, table movement or fraudulent wheel manipulation.

In addition, the Saturn Roulette Wheel is available with a ball track inclinometer, delivering real-time security enhancements and abnormal event detection. This alleviates the need for daily leveling of wheels by maintenance staff and allows Dealers to check wheel integrity at the start of a shift.

Saturn™ Data Logger

The Saturn™ Data Logger captures winning number results and ball drop behaviour. With the capacity to store a minimum of 6 years worth of events, Data Logger captures: winning numbers, ball in rim/no more bets, direction & speed of ball, patented ball 'Drop Zone Detection', power on/off, winning number conflict messages, dealer miss spin information and much more. The data is easy to download using an external download and a wide range of reports can easily be generated.

Unique design to suit your casino

Each Roulette wheel is expertly manufactured to your design specification. With a wide range of colours and finishes available, the Saturn™ Roulette Wheel can be customised to suit any casino brand, colour scheme or theme. What's more you can design your very own Saturn™ Roulette Wheel using our Roulette Wheel Configurator on the website.
