TCSJOHNHUXLEY

Double-Up Blackjack takes traditional Blackjack to a whole new level!

Double-Up Blackjack is a game inspired by traditional Blackjack, which allows players to double their initial wager after having seen their first two-cards (except natural Blackjacks).

*Standard game rules apply for all doubles and splits.

Double-Up The Win!

To participate, standard Blackjack house rules are followed for the first two cards dealt to the player. The player will have the option to either stand, receive another card, or Double-Up by placing a second wager equal to their original bet.

- If the player chooses the Double-Up option, they must then stand on their original two card total.
- If the Player's hand beats the Dealer's hand, both the Double-Up wager and the main wager wins (1:1 for both bets).
- If the Dealer's hand beats the Player's hand, both the Double-Up wager and the main wager will lose.

- In the event that both the Dealer's hand and Player's hand tie, only the Double-Up portion of the wager will lose.
- In addition to the Double-Up rule, the following standard Blackjack rules are employed:
 - Six or Eight decks are used
 - The dealer hits on Soft 17
 - Surrender is not offered

Blackjacks and 21's (Player)

- Blackjack pays 3:2 or 6:5
- 21 plays 1:1

Blackjacks (Dealer)

In the event both the Dealer and Player have Blackjack, the Player's bet will push. All other bets remaining at the table will only lose their original bet (all Splits/Double-Down/Double-Up bets will push and retained by the player).

End 16 Rule

Any time the dealers' cards reach a total of 16 (hard or soft) the game will stop.

- Any player Blackjacks will pay 3:2 or 6:5
- All 21's will pay 1:1
- All remaining bets on the table will push

Bonus 16 Side Bet

Bonus 16 is an optional side bet that is made on the outcome of how many cards the dealer draws to their hand to make a count of 16. (Hard or Soft).

Example: dealer cards: 7 – 4 – 5 = 16.

Payout – (3 cards) = 5:1

Bonus 16 is played independently from the regular game. (A player must have a main bet wager to play the Bonus 16 side bet). This bet must be placed prior to any cards being dealt.

All bets placed on the Bonus 16 side bet will be resolved after the primary Double-Up game has been completed.

If the dealer draws to a hard or soft sixteen, the dealer's hand is complete, and the game will end. No further cards will be drawn.
