

Saturn™ Wheelmate

Wheelmate is the latest development to the Saturn™ Roulette Wheel range which adds a whole host of new features for engineers and maintenance staff.

Features & Benefits

- Touchscreen console
- Records all maintenance and servicing checks
- Includes Wheel Levelling, Wheel Rotation and Calibration
- Complete deceleration tests
- Can fully configure LEDs and game states
- All data stored within the wheel
- Monitor and audit scheduled maintenance activities
- For additional reporting the data can be downloaded to a PC/ Laptop via the USB without any additional hardware required
- Only available for the latest Saturn™ Roulette Wheels
- Enables the casino to monitor scheduled maintenance activities are being performed
- Portable and compact plug-in console

Perfect Maintenance Toolkit

Wheelmate is the perfect toolkit to assist engineers and maintenance teams. Available with the latest Saturn™ Roulette Wheel, this compact plug in console enables casinos to easily monitor and maintain their Wheels, keeping them in peak performance at all times.

Wheelmate is compact, completely mobile and simply plugs into a wheel to record and store data alleviating the need to download to a laptop. Wheelmate delivers powerful new features that records all maintenance events to get a full picture of how the wheel is operating, whilst also providing easy to access levelling information and wheel configuration tools.

Keeps Wheels at Peak Performance

Using the built-in Inclinometer the casino can quickly and easily confirm and visually level the wheel using the digital level bubble. No more carrying bulky tools to check if a wheel's level.

The casino can use both the built-in background monitoring and on demand deceleration test, to ensure the bearings in the wheel are working as desired and the wheel is continuing to spin during games.

Records all Data

Recording all maintenance activities on the wheel enables a casino to monitor and audit any scheduled maintenance activities that are being performed on the wheel. Recording the dates and times of all maintenance tasks performed on the wheel provide the casino with the wheel's lifetime maintenance activities, that are easily auditable by the on-screen report.

For additional reporting and analysis such as wheel bias and historical wheel results, data can then be downloaded to a PC/Laptop via the USB without any additional hardware required.

Product Specifications

Width	144mm	5.66inch
Depth	101mm	3.96inch
Height	20.31mm	0.79inch
LED Configuration Options	Glo Colour Creator (option to customise the LED Glo colour)	
	Glo Control (option to change colours, patterns and brightness for each game state)	

Glo Control Configuration Screen
