

Velocity Auto Roulette Wheel

Velocity is a revolutionary all-new automated Roulette wheel that will redefine the gaming experience of land-based and online operators.

Inspired by the success of the Saturn™ Auto wheel, the Velocity Auto wheel features cutting-edge technology and an innovative design to deliver unparalleled performance, reliability, security and player satisfaction.

VELOCITY

Innovative New Features

Velocity boasts a range of innovative features designed to enhance the gaming experience. One of the standout features is its unmatched speed, with faster static launches that create a more dynamic and engaging gameplay. The Wheel features three operation modes, Remote (controlled by server), Manual (controlled by Wheel mate), and Automatic (system driven), perfect for all casino environments.

Velocity is built with high-quality materials and is designed to be tamper-proof, ensuring the integrity of your games.

Additionally, Velocity's sleek compact design seamlessly integrates into any live roulette table, offering maximum flexibility for casinos.

To ensure optimal performance and minimise downtime, Velocity is equipped with Wheelmate, a powerful maintenance and monitoring tool. This versatile console allows for easy configuration, maintenance, and even manual game operation, providing casinos with greater control over their roulette experience.

Features & Benefits

Unmatched speed with faster static launches

Available with the pioneering Wheelmate - a unique technology from TCSJOHNHUXLEY

Three discreet embedded sensors to detect winning numbers

Change between modes quickly and easily with flexible operation modes - Manual, Remote, or Test

No bulky and noisy air compressor required - everything built into the wheel

Full self-maintained maintenance tool kit provided

Level the wheel in seconds. Built-in levelling for maximum security

LED colour/game control via the Wheelmate

Select from standard pockets or the visually striking Diamond Rotor

A new convenient access door allows a single engineer to perform all maintenance tasks without the need to overturn the wheel.

Supports low staffing levels by connecting to EGTs such as Qorex or operating with fixed game cycles.

Experience reduced noise levels and a lighter design for a more enjoyable gaming experience.

Safe and secure 24-hour operation

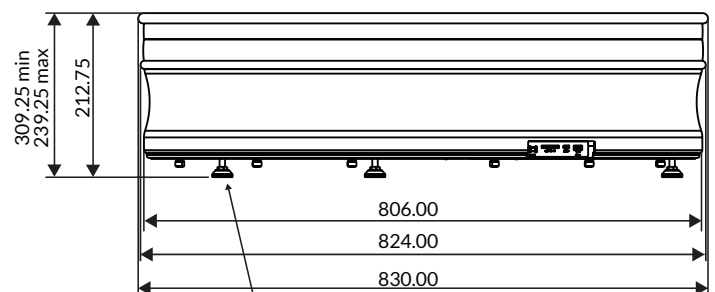

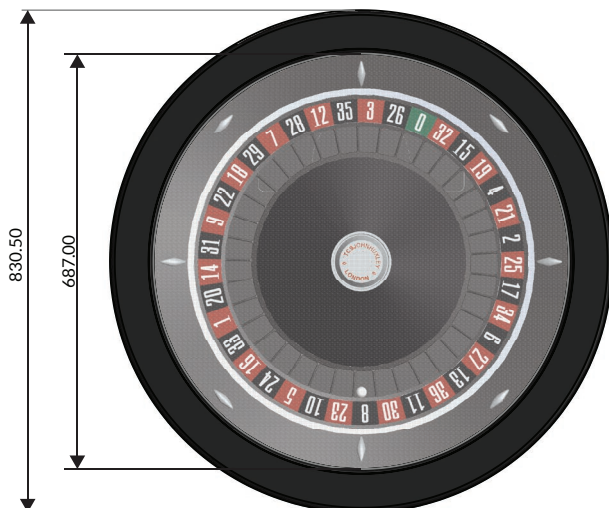

Compatible with other TCSJOHNHUXLEY products including the Winning Number Display range

Compact Design

With its compact design the Velocity wheel is designed to fit seamlessly onto any live Roulette table, offering flexibility for casinos to integrate it into existing furniture or display it on a standalone podium. With no bulky, noisy air compressor required, all components are built into the wheel, ensuring a quiet and efficient operation. As a result, Velocity is poised to become the new industry benchmark for automated Roulette wheels. Furthermore the wheel contains no bulky and noisy air compressor as all the operational mechanisms are built into the wheel.

Product Specifications

Wheel Diameter	830.5mm	32.7in
Bowl with feet Height	239.20mm - 309.20mm	9.42in - 12.17in
Wheel Weight - No Packaging	60Kg	
Wheel Weight - No Packaging	65kg	
Configuration	Single, Double, Triple and Quadruple Zero options, HiLite Podium or custom design (optional).	
Separator Ring	Standard or Diamond
