

Qorex 2 Terminal

Qorex 2 is the next generation of Electronic Gaming Terminals (EGT) from TCSJOHNHUXLEY that boasts a suite of impressive new features designed to enhance the player experience and empower casino operators.

QOREX²

Features & Benefits

Updated processing hardware to enable more modern features to be implemented and better graphics

Improved viewing angle and uses an industry standard 23.8" display. 27" model also available.

The modern graphics engine delivers an immersive user experience, allowing for more innovative and visually appealing graphics

Customisable game configurations to match operator preferences

Can connect live tables and electronic terminals by incorporating Supernova Jackpots

New top mounted stereo speakers for improved audio and sound quality

Wider selection of games than ever before, including Roulette, Baccarat, Sic Bo and Roulette Xtra

Customisable side bets and game options

Casino branding can be implemented within the gaming terminal UI

Tournament mode to run simple gaming tournaments system-wide

Redesigned accessories such as the drinks shelf and LED rear panel

Expanded Game Library and Customisable Side Bets

Qorex 2 offers a diverse range of games to cater to a wide variety of player preferences. Enjoy classic favorites like Roulette, Baccarat, and Sic Bo, along with the exciting Roulette Xtra. The redesigned user interface and advanced games engine not only enhance player engagement but also facilitate the rapid development of new side bets and game content tailored to specific operator requirements. All games can be configured with specific min, max, tax, and credit limits to allow a venue to control their liability

Tailored Solutions for Every Casino

Qorex 2 offers unparalleled customisation options to meet the specific needs of casino operators worldwide. From game configurations to branding, we provide flexible solutions that allow you to create a truly personalised gaming experience. Casino branding can be implemented within the gaming terminal UI. A customer can add corporate branding as user interface logos or backgrounds.

This flexibility allows casinos to create unique gaming experiences that resonate with their target audience and drive player satisfaction.

Supernova Jackpots for Qorex 2

Supernova Jackpots is a revolutionary progressive jackpot system designed to enhance the excitement and engagement of your live table games. Now, you can bring this proven success to your electronic gaming terminals with Qorex 2.

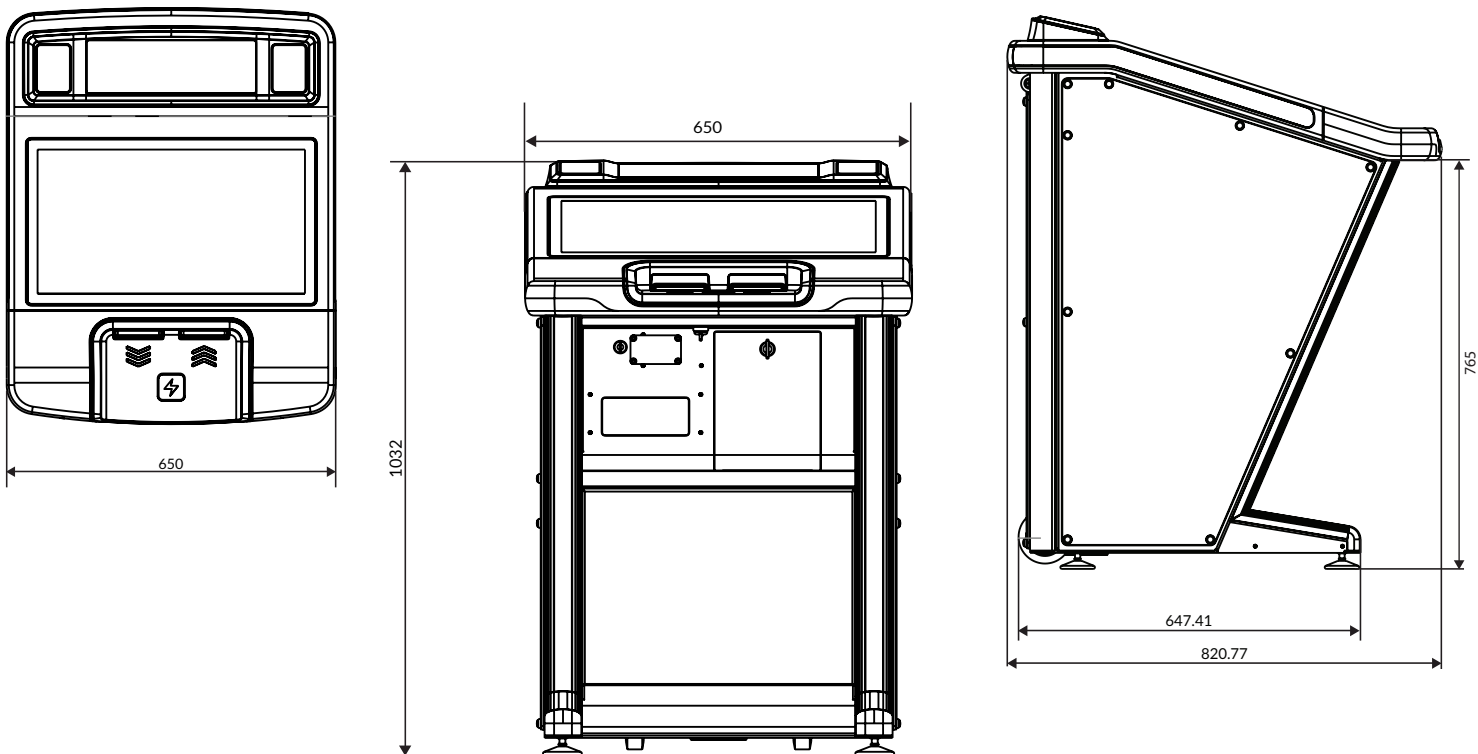

By connecting live tables and electronic terminals, Supernova Jackpots offer players the thrilling opportunity to win life-changing payouts regardless of their preferred game or location. This innovative and unique feature creates a shared sense of excitement, drives player engagement, helps a casino stand out from the competition and will significantly help boost revenue.

Wide Range of Updated Accessories

Qorex 2 offers a range of redesigned accessories to enhance both functionality and aesthetics. The drinks shelf and LED rear panel provide unparalleled customisation options, allowing you to tailor your terminals to match your casino's unique style and layout. The attendant light module includes loyalty plates and speakers for added convenience and personalisation. The door LEDs extend around the rear of the terminal door, creating a visually striking effect. Additionally, the wireless charger has been integrated into the terminal, simplifying the player shelf design and eliminating the need for unnecessary electronics.
